OVERVIEW

Tanzania safaris not only offer an unforgettable experience for travelers, but also play a crucial role in wildlife conservation and the protection of natural habitats. Many safari operators in Tanzania are committed to sustainability and work closely with local communities and conservation organizations to ensure the long-term protection of wildlife and ecosystems.

Itinerary

[Day 1: Arusha – Lake Manyara National Park](#)

✓ In the morning you will be picked up from your hotel and after a short briefing you set off to the Lake Manyara National Park. The small park stretches along the 600 m high Rift Valley Escarpment and is dominated by the alkaline Lake Manyara. Many water birds gather at the lake and more than 400 bird species are found in the park. The diverse vegetation provides a habitat for many animals such as monkeys in the forest, giraffes and antelopes on the grasslands and elephants around the acacia trees. If you are very lucky you might also see the Manyara lions, lounging in the trees. In the late afternoon you will leave the Lake Manyara National Park and head for overnight.

[Day 2: Lake Manyara – Serengeti National Park](#)

✓ After breakfast you will drive towards the fertile crater highlands where the farmers grow wheat, corn and coffee. You will pass the Ngorongoro Crater before you reach the plains of the Serengeti National Park around midday. Serengeti is the largest park in Tanzania and has a diversity of habitats and landscapes including short

grass plains, savannah, thick bush, swamps, mountains and lakes. Depending on the season you will witness the migration of thousands of animals for which this park is famous for. You will spend the night at the selected accommodation.

Day 3: Serengeti National Park – Ngorongoro Conservation Area

✓ Early morning is a perfect time for a game drive. Here in the Seronera region you will often see wildebeests and zebras in close proximity of lions and other predators such as leopards and cheetahs. After a picnic lunch you will continue your journey towards the Ngorongoro Crater. Once you have reached the crater rim you will enjoy fantastic views of this 600 m deep collapsed volcano. In the evening, you will be taken to selected accommodation for overnight.

Day 4: Ngorongoro Crater – Arusha

✓ After an early breakfast you will drive down the steep and narrow road that takes you into the crater. The slopes are forested but soon the landscape changes to savannah. Here the wildlife is just breath-taking and with a little luck you can observe the “Big Five” – lion, elephant, buffalo, rhino and leopard – in just a few hours. After a morning dedicated to game viewing and a picnic lunch, you will leave the crater in the early afternoon to drive back to Arusha, where you will arrive in the early evening.
